

Saulius Kulikauskas

(Front-End Web Developer)

I've worked in a variety of sectors over the past ten years (banking, customer service, content creation, logistics). I was able to develop a wide range of skills through my jobs in several industries, including satisfying customer needs, meeting deadlines, and KPI fulfilment.

I can operate both independently and in a group setting. I am trustworthy, loyal, responsible, yet occasionally I may be a bit of a perfectionist, but always willing to learn more. Finding a place where my work will be appreciated and acknowledged is what I am looking for.

Notable Projects

[LIVE SITE](#)

[CODE REPOSITORY](#)

"Project MUNI"

A very simple one page concept to showcase the lore and images for one of the most hated champions in the League of Legends world - Teemo. Main idea was to replace every mention of Teemo with my friends online alias and make it to embody the spirit of the devil.

Technology used: HTML, CSS, Bootstrap

[CODE REPOSITORY](#)

"Stop Being Bored!"

API usage based website that tries to cure your boredom by suggesting you a random movie and a book. Main focus is on acquiring information from a public API and then display it in a very simple and understandable format. Future plans include adding more functionality and possibly a redesign.

Technology used: HTML, CSS, JavaScript, Bulma, API, Axios

[CODE REPOSITORY](#)

"vMix Rental" (redesign)

A redesign of a very outdated looking landing page to bring it into 21st century. Main focus is on keeping it simple, yet making it a lot more engaging and interactive to improve user experience. You can see the original site [here](#).

Technology used: HTML, CSS, JavaScript, Bulma

Additional Information

Education

Professional bachelor's degree in Banking.
Vilnius University of Applied Sciences (2010-2013)
